

VIBEZ — Investor Pitch Deck

Real-Time Social Venue Intelligence · Africa

Pre-Seed · February 2026 · Lagos, Nigeria

SLIDE 1 — COVER

The live intelligence terminal for city experiences.

Not a nightlife app. Not a discovery tool. Infrastructure.

The data layer underneath Africa's \$20B+ experience economy — starting in Lagos.

Africa-First · Real-Time · AI-Powered · Terminal, Not App

Pre-Seed Round · Seeking \$500K–\$2M · \$4–6M Valuation

SLIDE 2 — THE PROBLEM

You never know where the energy is until it's over

The problem isn't just nightlife. It's every social venue, at any hour.

Scenario	The Failure
Saturday night — where's the vibe?	Google "Popular Times" = historical averages from months ago
Sunday brunch — any good spots open?	Yelp reviews from last year. Dead before you read them.
Event tonight — worth going?	WhatsApp group of 12. Unreliable. Unstructured. Too late.

Nigeria's social experience economy is worth **\$5B+ annually** — nightlife, restaurants, events combined. Not a single platform tells you where the energy is **right now**, for any of it.

SLIDE 3 — THE SOLUTION

Live vibe scores for any venue, any hour

"Quilox will be electric by 12:30am tonight — 87% confidence. Best time to arrive: 11:45pm."

"The Place Restaurant is peaking right now — 82 vibe score. No wait at the door."

"Afrobeats concert at Eko Hotel: gates open, energy building — best time to arrive is now."

How it works:

-  **Live Scouts** — On-the-ground users rate Energy, Capacity & Gate from inside any venue in real time
-  **Vibe Score** — Live composite score (0-100) updated every few minutes with time-decay weighting

- 🦄 **AI Intelligence** — Oracle predicts peaks. DNA learns your taste. Ask Vibe plans your night.

Clubs & Lounges · Restaurants · Concerts & Events · Brunch & Day Parties · Church Programs

3-Storey Platform · Scouts · Merchants · Admins · iOS + Android

SLIDE 4 — THE PRODUCT

Three floors. One platform.

● **Public Floor — Scouts**

- Real-time venue map + live vibe score pins
- 3-dimension rating: Energy / Capacity / Gate
- Clout system + scout rankings (Newbie → Elite)
- Crew & Cartel — squad social features
- Vibe Oracle + DNA + Ask Vibe AI
- Streaks, badges, leaderboards, personas

● **Merchant Floor — Venue Owners**

- Live analytics dashboard with vibe intelligence
- Hourly energy curves + peak hour detection
- Pulse Drops — promoted venue pins (2× clout for scouts)
- Aura Shield — automated alerts when vibe drops
- Campaign tools + direction click tracking

● **Admin Floor — Platform Ops**

- Full platform command center
 - Treasury & revenue management
 - Venue certification + user management
 - Platform-wide analytics
 - Paystack payment integration
-

SLIDE 5 — MARKET SIZE

A category nobody owns — across every venue type

We start with nightlife because it's the hardest proof-of-concept. If we can tell you where the energy is at 1am, we can tell you at 1pm for brunch too.

Nigeria Social Experience Economy

Segment	Size
🌃 Nightlife	\$1B+
🍷 Restaurants & Dining	\$1.5B+
🎵 Events & Concerts	\$800M+

Combined (Nigeria)	\$5B+
 Africa Total	\$20B+
 Global Experiences	\$50B+

Expansion Roadmap

- **Phase 1** — Nightlife beachhead, Lagos (2026)
- **Phase 2** — + Restaurants & Brunch, Lagos + Abuja (2027)
- **Phase 3** — + Events, Retail, Tourism · Pan-Africa (2028)

Serviceable Market (5-year): \$500M (5 countries × SaaS + marketplace + data licensing)

Beachhead — Lagos Year 1: ₦60M (50 venues × ₦100K average subscription)

Competitive gap: 0 platforms with real-time venue intelligence for any category in Nigeria

SLIDE 6 — BUSINESS MODEL

Multiple high-margin revenue streams

Revenue Stream	Pricing	Margin	Launches
 Merchant Subscriptions	₦50K–500K / venue / month	90%+	Month 3
 Pulse Drops	₦20K–100K per drop	95%	Month 4
 Aura Shield Premium	₦100K / venue / month	92%	Month 4
 Brand Partnerships	₦2M–10M / quarter / brand	80%	Month 9
 Data Licensing	₦500K–2M / quarter	98%	Month 9
 Event Ticketing	5–10% commission	85%	Month 12

Unit Economics:

- LTV / CAC: **10–25×**
- Gross Margin: **90%+**
- User Acquisition Cost: **\$0.50–2** (organic + referral)

SLIDE 7 — WHAT WE'VE BUILT

Production-ready. Investor-presentable.

10–14 months of equivalent dev work. Full-stack. Demo-ready tonight.

Intelligence Layer

- **15 custom algorithms** — vibe scoring, time-decay, trending, geofence, forecast accuracy
- **Vibe Oracle** — peak-time predictions (pipes ready for ML upgrade at 20K users)

- **Vibe DNA** — behavioral taste fingerprint from rating history
- **Ask Vibe** — AI concierge (Claude API activates on key set — zero code change)

Platform Depth

- **3 full user tiers** — Scouts, Merchants, Admins with separate complete experiences
- **Real-time infrastructure** — Socket.IO live updates + Paystack payments
- **Demo mode** — investor walkthrough with 12 venues + scripted Planner conversation
- **Social graph** — Crew, Cartel Radar, squad locations, Vibe Persona system

Stat	Value
Custom Algorithms	15+
AI Feature Pipes Built	3 (Oracle, DNA, Planner)
User Tiers Fully Built	3
Demo Venues Seeded	12

SLIDE 8 — THE TERMINAL THESIS

Most apps are discovery tools. VIIBE is infrastructure.

A terminal implies outputs that others act on — not just consumers deciding where to go tonight, but venues, promoters, brands, and city planners querying live crowd intelligence.

What the terminal produces

Output	Who acts on it
Live Vibe Score (0–100) per venue	Consumers — where to go tonight
Hourly energy curve + peak detection	Venue owners — staff, spend, promotions
City-wide heat map — real-time	Promoters, brands — activation targeting
Crowd density + footfall patterns	City planners, tourism boards, investors
Taste profiles + movement between venues	Acquirers — Meta, Google, Spotify, Uber

The data flywheel

The more people participate, the richer the signal. The richer the signal, the more the terminal is worth. The more it's worth, the more people participate.

100 million data contributors is the ceiling, not the dream. The app lowers the barrier to zero — anyone physically near a venue is already a data point. VIIBE makes contributing that signal frictionless and rewarding.

SLIDE 9 (OLD 8) — AI STRATEGY (THE REAL MOAT)

The app is the data collection device. The AI is the actual product.

After 12 months in Lagos we'll own a real-world behavior dataset — across nightlife, restaurants, events, and more — that doesn't exist anywhere else on earth. The Vibe Score is the Bloomberg Terminal of social energy — consistent, auditable, manipulation-resistant, versioned.

AI Features — Status

Feature	What It Does	Status
 Vibe Oracle	"Quilox will be electric by 12:30am — 87% confidence"	✅ PIPES BUILT
 Vibe DNA	Behavioral taste fingerprint from real rating history	✅ PIPES BUILT
 Ask Vibe	Natural language venue concierge — clubs, brunch, concerts, events	🔑 CLAUDE API READY
 Crowd Intelligence	Computer vision auto-fills ratings from scout photos	Planned Month 12
 Vibe Autopilot	AI runs merchant marketing automatically	Planned Month 18

Data Assets We'll Own

- Real-time crowd behavior (nobody else in Africa)
- Hour-by-hour venue performance patterns
- Social graph of Lagos venues — who goes where, with whom, at every hour
- Real-world taste profiles of 100M+ participants
- Location movement patterns between venues on a night out

The pitch that gets the exit:

"We're building the live intelligence terminal for human social behavior in Africa. The consumer app is how we get to 100 million data contributors. The terminal is what we sell."

SLIDE 9 — COMPETITION

Nobody does real-time in Africa

Platform	Data	Africa	Real-Time	AI
Google Maps	Historical averages	✗	✗	✗
Yelp / TripAdvisor	Static reviews	✗	✗	✗
Instagram	Unstructured posts	Partial	Partial	✗
Eventbrite / Tix.africa	Ticketing only	Partial	✗	✗

VIBEZ ✦	Live vibe from scouts	✔ Lagos-built	✔ Minutes	✔ Oracle+DNA+Planner
---------	-----------------------	---------------	-----------	----------------------

The data moat compounds every night — and every brunch, every concert, every event — we operate. First-mover advantage in real-time venue intelligence is nearly impossible to replicate.

SLIDE 10 — TEAM

Built by someone who lives the problem

Oluwaseun Oluyori Ajagun — CEO & CTO

- Full-stack engineer. Built the entire platform — backend, mobile, AI layer — from scratch.
- Deeply embedded in Lagos social culture: clubs, restaurants, events, and everything in between.
- Stack: React Native · Python/FastAPI · MongoDB · Socket.IO · Paystack

What we've proven:

- ✔ Can ship at speed — full 3-tier platform built in months
- ✔ Product instinct — 30+ features, zero wasted builds
- ✔ AI-forward — Oracle/DNA/Planner without being prompted

Immediate hires with funding:

- → Lagos City Lead — venue onboarding + scout recruitment (clubs AND restaurants AND events)
- → Growth / Community Lead — WhatsApp groups, influencer scouts
- → Partnerships Lead — alcohol brands, F&B brands, venues, events

Looking for advisors with: Lagos venue networks · Nigerian consumer startup experience · F&B or entertainment brand relationships

SLIDE 11 — FINANCIALS & MILESTONES

Clear path to \$250M exit

Growth Projections

Milestone	Venues	MAU	MRR
Month 12 — Lagos (nightlife beachhead)	50	10K	₦5M (~\$3.3K)
Month 24 — Nigeria (+ restaurants/events)	200+	100K	\$50K
Month 36 — West Africa	500+	500K	\$200K
Month 42 — Exit / Series B	Pan-Africa	—	\$250M+

Fundraising Roadmap

Round	Amount	Valuation	Use
-------	--------	-----------	-----

Pre-seed (Now)	\$150–300K	\$2–3M	Lagos nightlife launch · 3-person team
Seed (Month 10)	\$1–2M	\$8–12M	Nigeria expansion · restaurants + events
Series A (Month 24)	\$5–10M	\$40–60M	West Africa · AI feature upgrades
Series B / Exit (Month 42)	—	\$250M+	Strategic acquisition

Target acquirers: Booking.com · Spotify · Google Maps · Meta · Uber · Flutterwave · Paystack

SLIDE 12 — THE ASK

We're raising \$150–300K pre-seed at a \$2–3M valuation

To plant our flag in Lagos — clubs, restaurants, events, brunch spots — before anyone else moves.

Use of Funds

Allocation	Amount	For
 Lagos Operations	40%	City Lead hire · scout recruitment · 20 venue onboardings (all types) · launch night
 Product & Tech	35%	App Store/Play Store · Claude API (Ask Vibe live) · infrastructure
 Growth & Brand	25%	PR (TechCabal, Techpoint) · influencer scouts · social blitz · launch events

6-Month Milestones

- 20 Lagos venues onboarded (clubs, restaurants, event spaces)
- 500 active scouts
- 2,000 MAU
- 5 paying merchants
- First ₦ of recurring revenue

Seed Triggers (Month 10)

- 10K MAU · ₦5M MRR · 50+ venues · Clear D30 retention data

What You're Buying

- Category creation — nobody owns this in Africa
- First-mover data moat that compounds with every scout rating
- AI intelligence layer with 3 feature pipes already built
- Africa's venue graph — every type, every hour

Built with conviction. Launching from Lagos. Scaling across Africa.
